

# Setting up Application Environment

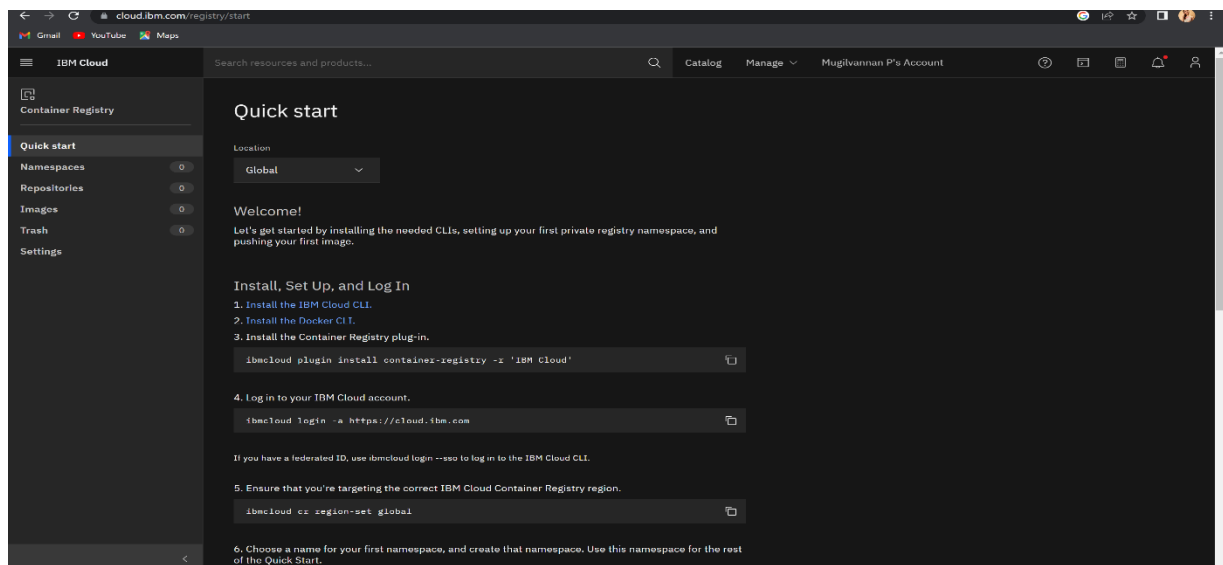

## Install IBM Cloud CLI

Date	21 October 2022
Team ID	PNT2022TMID25734
Project Name	Skill/Job Recommended Application

**Step 1. First login with cloud.ibm.com,—>Next search with Container Registry in ibm search catalog**

**Step 2 Next click Get started button → Next click Install the IBM Cloud CLI.**

## Step 3: In cloud CLI there is list of commands insert the into our windows command prompt

The screenshot shows the IBM Cloud Docs page for 'Setting up the CLI'. The left sidebar contains a navigation menu with categories like 'Kubernetes service', 'How to', and 'Expand all'. The main content area is titled 'Setting up the CLI' and includes a sub-header 'Installing the IBM Cloud CLI and plug-ins'. It provides instructions on how to install the CLI and lists several plug-ins: IBM Cloud CLI, IBM Cloud Kubernetes Service plug-in, IBM Cloud Container Registry plug-in, and IBM Cloud Kubernetes Service observability plug-in. A tip suggests using the IBM Cloud console or the IBM Cloud Shell. The bottom of the page shows a terminal snippet with the command '\$ ibmcloud login'.

This screenshot shows the same IBM Cloud Docs page as above, but with a Windows Command Prompt window overlaid in the center. The Command Prompt shows the execution of the 'ibmcloud plugin install container-service' command, which successfully installs the 'container-service' plug-in. It also shows the execution of 'ibmcloud plugin install observe-service', which successfully installs the 'observe-service' plug-in. The Command Prompt window is titled 'Command Prompt' and shows the user's path as 'C:\Users\mugil>'. The background page shows the 'Setting up the CLI' instructions and the '\$ ibmcloud login' command at the bottom.

**STEP 4: After entering all commands the cloud CLI installation is done.**

```
Microsoft Windows [Version 10.0.22621.755]
